

Lennox Hill Podiatry is now offering a new, innovative treatment option called

Radial Shockwave Therapy

If you are suffering with foot, heel or ankle pain, your solution is here!

This cutting-edge technology treats foot, heel and ankle pain at the source by triggering the body's natural healing response. All without injections, time consuming physical therapy and even surgery! The best part is, there is NO downtime! Patients can resume daily activities the same day with minimal pain or discomfort!

Each treatment takes just 5 minutes, once a week for approximately 4 to 5 weeks.

If you have been looking for a quick, effective and non-invasive treatment option, then ask us about RSWT so you can get back to being pain free!
